

# Twin Axle Self Contained Mobile Steam Cleaner

## Trailer Mounted Hot Water Pressure Washer for Street Cleaning

These units are designed to clean where neither power or water supply is available. They are mounted in a galvanised trailer and bodywork to prevent any metal corrosion.

This is a fully self contained unit with the front and rear compartments hinged to allow easy access for daily operation, routine maintenance and storage facilities.

The twin axle trailer is an adaptable and effective solution for unwanted graffiti, chewing gum removal and general street cleansing by way of its steam cleaning and hot water pressure washing capabilities.

The steam generator is driven by either a diesel or petrol engine fitted with electric start and easy to use control panel.

- Chemical free chewing gum removal
- Pavement cleaning at up to 100SqM per hour
- Galvanised trailer
- Up to 2.5 hours - with the option for continual use
- Low noise
- Unobtrusive design is ideal for pedestrianised areas
- Self retracting hose reel

### Specifications
