

Van Mounted Mobile Steam Cleaner Unit

For Gum & Graffiti Removal

This unit is ideal for gum, graffiti, street cleaning and many other industrial cleaning applications. The tools are completely self-contained and 100% mobile. It is the quietest in its class, making it perfect for working in residential areas.

Trafalgar Cleaning Equipment has developed a quiet, unobtrusive and low maintenance solution to combat the major problem of discarded chewing gum. Our van mounted units provide a versatile and effective opportunity to deal with troublesome gum and graffiti.

We can build the vehicle to suit your requirements

The customer leads the design on all of our conversions. Let us build a vehicle specifically to your requirements. We can fit most types of vehicle, subject to them having the correct payload, please contact our dedicated sales team for further information.

Fitted with a Karcher HDS 1000DE

Each vehicle is fitted with the reliable Karcher HDS 1000 DE hot pressure washer. This is a diesel fuelled hot water high pressure cleaner built with a sturdy tubular frame, that features a convenient electric starter which has the engine running in seconds.

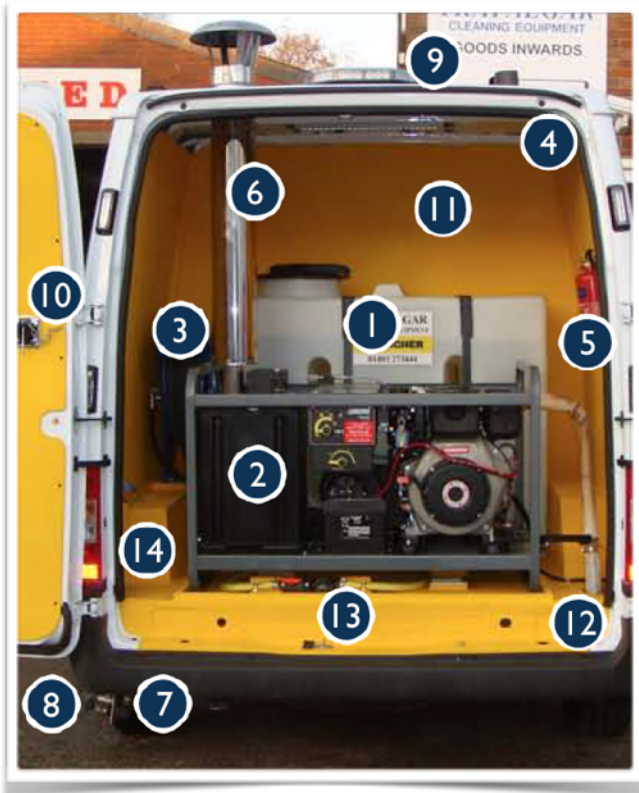

Features

- Operated with doors shut, reducing noise to a minimum
- Fully self contained, fill up with water & diesel and go
- Up to 2.5 hours - with the option for continual use
- Ergonomically designed storage for ancillary equipment
- Up to 90m of high pressure hose
- Fully waterproof and sealed to increase the life of the vehicle
