

# CITY WASHER GUM & GRAFFITI REMOVAL UNIT

THE IDEAL SOLUTION FOR REMOVING GUM, GRAFFITI AND PERFECT FOR STREET CLEANSING

## Introducing the smallest and most compact mobile Gum & Graffiti removal unit on the market -The New Trafalgar City Washer

The Self Contained Mobile Van Mount (SCMVM) has everything onboard for a full days street cleaning. Being self contained everything has its place making 'start-up' and 'pack-down' as efficient as possible. The set up on the SCMVM is unique. The whole operation can take place with the doors shut closed. This not only makes the unit safe and secure but also the quietest in its class.

The Trafalgar City Washer is built on an electric Goupil G4 and is loaded with all the same features as the Van-Mount but in smaller proportions making it the ideal solution for removing gum, graffiti, street cleaning and many other industrial cleaning applications from our city streets. The onboard tools are completely self-contained and 100% mobile and is the quietest in its class making it perfect for working in residential areas.

Remove stubborn chewing gum, graffiti and street grime from our city streets with the smallest gum and graffiti removal unit on the market .

The Trafalgar City Washer is a natural progression from our flagship Van-Mount Gum and Graffiti Removal Unit as we enter a new zero emission era, and although the technology for pressure washers has a long way to go, we can at least meet new electric vehicle standards on both our flagship Van Mount Units, and in the new Trafalgar City Washer that is built on a Goupil G4, fully loaded with all of the Van-Mounts features, with a bespoke cover design unique to Trafalgar, making it the smallest gum and graffiti removal unit on the market.

This quiet, unobtrusive, and minimal maintenance solution to combat gum and graffiti removal is the quietest and smallest in its class making it perfect for local authorities, agriculture, plant hire and contract cleaners working in residential areas, shopping malls, park areas and remote areas.

The Trafalgar City Washer is the ideal cleaning solution for removing chewing gum and graffiti from our city streets and pavements on an industrial scale but from a small mobile unit. Along with its core features for gum and graffiti removal the City Washer is also the ideal solution for cleaning down the grime on our streets and pavements in city and urban areas that require industrial cleaning with hot steam water.

## Small and compact it may be, but the City Washer is fitted with a powerful and robust hot water pressure washer that cuts through gum, graffiti and street grime like butter!

Each vehicle is fitted with our recommended best of class powerful and robust hot water pressure washer cleaner. These are diesel fuelled hot water high pressure washer cleaners built with sturdy tubular frames that feature electric starter which has the engine running in seconds.

Features:

- Operated with doors shut, reducing noise to a minimum
- Fully self contained, fill up with water & diesel and go
