

VAN MOUNTED GUM & GRAFFITI REMOVAL UNIT

THE IDEAL SOLUTION FOR REMOVING GUM, GRAFFITI AND PERFECT FOR STREET CLEANSING

This all in one self contained van will remove gum, graffiti, and makes street cleansing and easier task.

The Self Contained Mobile Van Mount (SCMVM) has everything onboard for a full days street cleaning. Being self contained everything has its place making 'start-up' and 'pack-down' as efficient as possible. The set up on the SCMVM is unique. The whole operation can take place with the doors shut closed. This not only makes the unit safe and secure but also the quietest in its class.

Power Units

The majority of the fit-outs we do use the tried and tested Karcher HDS 1000DE steam cleaner. This gives the best set up and payload for productivity. This doesn't mean we are governed by this power source, we have larger 3 cylinder units available with more power and even twin lance option.

Bespoke Solutions

The van mounted units can be built on different platforms, vans and vehicles.

Trafalgar can design these to fit individual requirements. Providing it is safe and legal we can offer solutions to meet all requirements.

Call 01403 273 444 and speak to one of our trained sales team for advice and to arrange a free on-site demonstration.

VAN MOUNT FEATURES

- Operated with doors shut, reducing noise to a minimum
- Fully self contained, fill up with water & diesel and go
- Up to 2.5 hours - with the option for continual use
- Ergonomically designed storage for ancillary equipment
- Functional up to 90 meters for vehicle

Front Compartment (Dry Section)

1. Whole compartment sprayed with this hard epoxy resin coating to waterproof and protect vehicle from interior rusting and damage.
2. Fire Extinguisher
3. Hot Hand Wash
4. Eye Wash & First Aid Kit (Not shown in above image)
5. Strip Lighting
6. Manual Fletner
7. Vehicle Overload Protection System (This device provides both audio and visual warnings of the vehicles current weight. Not only will it indicate an overall overload, it will also indicate if either axel is over weight.)
8. 18" Rotary Floor Tool (Ideal for flat surface cleaning.)
9. Compartmented Storage
10. Chemical Storage Cabinet

Rear Compartment (Wet Section)

1. 650 Litre Baffled Water Tank (Fitted with ball cock system that prevents overflowing.)
2. Karcher HDS 1000 DE Hot Pressure Washer.
3. 30 Metre Retractable Hose Reel (Additional hose can be added, up to an extra 60 metres.)
4. Electric Fletner (Comes on automatically with the steam unit to vent away unwanted fumes.)
5. Fire Extinguisher
6. Flue for Burner Unit
7. Drain for Water Tank & Drip-tray
8. Filling Point for Water Tank
9. Flashing Strobe Beacon
10. Rear Door Outlet for Hose (This allows the unit to be operated with the doors closed, helping reduce noise and increase security.)
11. Waterproof Epoxy Resin Coating
12. Ventilation for the Generator Exhaust
13. Water Filter (All water from the unit passes through this.)
14. Hydrant Filling Adaptor
